

CETECOM USA Expands its 3G/MediaFLO Test Facility

- New Location Provides Double the Capacity of Old Facility -

April 22, 2009: San Diego, CA

CETECOM Incorporated (USA), a leading independent wireless technology testing and certification organization, today announced it has expanded its 3G/MediaFLO™ test facility by relocating it to 6370 Nancy Ridge Drive, Suite 101-102, San Diego, California 92121. All phone numbers remain unchanged.

The new building features double the square footage of the old location allowing for ample room to grow CETECOM Inc.'s current and future services. The San Diego facility currently offers test services for 3G technologies. It also recently became the only independent lab worldwide to offer MediaFLO test services for FLO™ Series I, II, III.

“Our main objective for the relocation was to be able to increase our test capacity while providing convenience in proximity to our Southern California customers,” said Lars Eriksson, COO of CETECOM Inc. “The new facility provides us the necessary space to embark on new services and we are extremely pleased with it.”

CETECOM Inc. San Diego was set up in 2006 as the 3G division of CETECOM USA. The facility is accredited by the PTCRB and is a CTIA Authorized Test Lab. It is also A2LA accredited.
